

Pebblecreek Montessori Introduces

Mommies' Time Out for infants ages 6 weeks -12 months

New parents can become easily overwhelmed due to lack of sleep and lack of time. Our Mommies' Time Out Program is an extension of our infant program designed to meet the needs of parents who do not need full time care. It is attractive to parents who are not working, not employed full time and/or preparing to return to work after a maternity leave. It gives them the flexibility of enrolling their infant in a quality part-time Montessori program without incurring the expense and commitment to full time.

Our infant program is designed to meet the needs of children ages 6 weeks-12 months. We follow the philosophy of Dr. Maria Montessori by creating a warm and nurturing environment. Our guides respect the babies as unique individuals who are in process of becoming toddlers by allowing them to develop in their own way and at their own pace. Although the infants are not yet verbal, guides speak to them pointing out things in the environment and explaining what is happening and what they can expect. For it is through the modeling of language that children develop language skills.

The environment is open with space for the infants to explore without unnecessary obstacles. Like all Montessori environments, it is critical that the classroom is prepared to meet the specific needs at this stage of development.

Montessori methods stress observation of the infant by the guides. By means of this observation, the guide learns the needs of the individual child: social, emotional, and developmental. This enables her to prepare a proper environment for each child's self-growth. As infants change continually, so must their environment change in appropriate ways. It is through careful observation that the caregiver knows how to make these changes.
